

## Turning Dreams Into Reality

We are a professional group of industrial machine manufacturing specialists that supports the entire manufacturing industry.

In addition to knowledge and experience cultivated through our long history, we use new ideas and methods to continually challenge ourselves to create products that earn our customers' trust and satisfaction.

Please start by telling us your desires, your needs and your story. The strength of Nishida Technical Industry will solve your problems and turn your dreams into reality.

### point 01

#### Integrated production

Do you have a vision of a machine that can boost your business, or feel like a machine you are using now is hard to operate?

We handle such requests and any other needs you may have through our integrated production system, which covers everything from design and development—focused on functionality and safety—to parts manufacturing, procurement, assembly and function adjustment, and after-sales maintenance.

Design and development

Parts manufacturing

Assembly and function adjustment

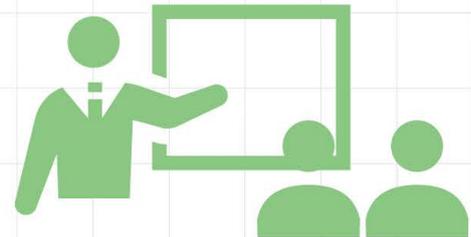

After-sales maintenance

### point 02

#### A proposal-based company

We believe that our value analysis/value engineering proposals—born from experience and expertise cultivated through our integrated production system—will earn your trust and satisfaction.

### point 03

#### High-precision machining of large castings

We operate our specialized machining equipment with experience, expertise, new technology and innovative ideas to meet the challenging demands of our customers for high-precision machining. In recent years, we've received numerous requests for large casting machining—using gray cast iron (FC) and ductile casting iron (FCD)—and our products have earned praise from our customers. We also accommodate requests for component machining only.
